

Representation transfer across frozen retrievers

Development Recall@100 · retriever identity dominates construction choice

	PatEmbed target	Arctic target	Qwen3 target
PatEmbed source	0.418436	0.337430	0.362570
Arctic source	0.418715	0.341341	0.359497
Qwen3 source	0.419274	0.338268	0.360615
Within-target range	0.000838	0.003911	0.003073

Nominal best in column

Matched-pair (same source and target)

Best source flips by target, but within-target spread (<0.004) is dwarfed by between-target gaps (0.018–0.08).
